

CHEMBLITZ OVER MOUNT HOOD,
OREGON

MT. SHASTA, CA - MAY 2007

LAS VEGAS TRIBUNE LINKS MASS
ILLNESS TO CHEMTRAILS

10 IMPORTANT FACTS YOU SHOULD KNOW ABOUT WEATHER MODIFICATION:

1) "On October 2, 2001, **Rep. Dennis Kucinich** (D-OH) introduced the "Space Preservation Act of 2001" (HR 2977), which called for the elimination of "exotic weaponry" from space. Among the weapons to be banned were weather-modifying weapons such as HAARP (High Frequency Active Auroral Research Program) and chemtrails. **Though HR 3616 was later amended to remove the section that would have banned chemtrails, the original bill acknowledging the existence of chemtrail technology remains on the pages of the *Congressional Record*.**" See: Earth Island Journal article, *Stolen Skies: The Chemtrail Mystery* at:

[http://earthislandinstitute.net/journal/index.php/eij/article/stolen skies the chemtrail mystery/](http://earthislandinstitute.net/journal/index.php/eij/article/stolen%20skies%20the%20chemtrail%20mystery/)

2) Las Vegas residents are increasingly noticing the appearance of chemical trails overhead. ...Such chemtrails" are substantially different in appearance to the normal condensation trails left by jet airliners. The difference is that while condensation trails are composed of water vapor that dissipates rapidly, "chemtrails" linger much longer and spread out over time to eventually cover the sky with a thin haze... **Especially disturbing for residents of heavily chemtrailed communities like Las Vegas is a "chemtrail sickness" associated with heavy spray days leaving many stricken people complaining of the "flu" and acute allergic reactions months ...along with debilitating fatigue - and something even more worrying.** See: Las Vegas Tribune article, "*Chemtrails Are Over Las Vegas* at:

<http://www.chembuster.us/Las%20Vegas%20Tribune.htm>

3) "In a May 2000 draft report submitted to the International Panel on Climate Change (IPCC), an expert panel chosen from among 3,000 atmospheric scientists, concluded that Teller's scheme might work. **But the IPCC warned against unpredictable upsets of the atmosphere. The panel also warned against angry populaces reacting to "the associated whitening of the visual appearance of the sky."**

"Caldeira [a Lawrence Livermore scientist who originally promoted this geo-engineering program] was so concerned that he went public. Deflecting sunlight would further cool the stratosphere, he warned, and this could intensify icy clouds of ozone-gobbling CFCs that could destroy the ozone layer - **the Earth's already damaged solar radiation shield.**" See:

[http://earthislandinstitute.net/journal/index.php/eij/article/stolen skies the chemtrail mystery/](http://earthislandinstitute.net/journal/index.php/eij/article/stolen%20skies%20the%20chemtrail%20mystery/)

4) "The Welsbach Patent proposed using "very fine, talcum-like" powder of 10 to 100 micron-sized aluminum oxide to produce a "pure white plume" in the sky. See:

[http://earthislandinstitute.net/journal/index.php/eij/article/stolen skies the chemtrail mystery/](http://earthislandinstitute.net/journal/index.php/eij/article/stolen%20skies%20the%20chemtrail%20mystery/)

5) According to the National Center for Atmospheric Research in Boulder, Co., the only way to form artificial clouds in warm dry air is to introduce enough particulates into the atmosphere to attract and accrete all available moisture into visible vapor. **If repeated often enough, the resulting rainless haze can lead to drought.** See:

[http://earthislandinstitute.net/journal/index.php/eij/article/stolen skies the chemtrail mystery/](http://earthislandinstitute.net/journal/index.php/eij/article/stolen%20skies%20the%20chemtrail%20mystery/)

6) A **Harvard School of Public Health** team determined that particulates with a diameter less than 10 microns (one-tenth the thickness of a human hair) pose a serious threat to public health. On April 21, 2001, the *New York Times* warned: "These microscopic motes are able to infiltrate the tiniest compartments in the lungs and pass readily into the bloodstream, and have been most strongly tied to illness and early death, particularly in people who are already susceptible to respiratory problems." See:

http://earthislandinstitute.net/journal/index.php/eij/article/stolen_skies_the_chemtrail_mystery/

7) According to the Lenntech's Periodic Paper, "The uptake of aluminum can take place through food, through breathing and by skin contact. **Long lasting uptakes of significant concentrations of aluminum can lead to serious health effects, such as:**

- Damage to the central nervous system
- Dementia
- Loss of memory
- Listlessness
- Severe trembling

Aluminum is a risk in certain working environments, such as mines, where it can be found in water. **People that work in factories where aluminum is applied during production processes may endure lung problems when they breathe in aluminum dust.** Aluminum can cause problems for kidney patients when it enters the body during kidney dialyses. Inhalation of finely divided aluminum **and aluminum oxide powder** has been reported as a cause of pulmonary fibrosis and lung damage. This effect, know as Shaver's Disease, is complicated by the presence in the inhaled air of silica and oxides of iron. May also be implicated in Alzheimer's disease."

8) Over 500 residents of the Espanola area have signed a petition raising concern over possible government involvement in what appears to be aircraft emitting visible aerosols. **They have found high traces of aluminum and quartz in particulate and rainwater samples. These concerns combined with associated respiratory ailments have led these Canadians to take action and seek clear answers from this government.** The petitioners call upon Parliament to repeal any law that would permit the dispersal of military chaff or of any cloud-seeding substance whatsoever by domestic or foreign military aircraft without the informed consent of the citizens of Canada thus affected." See:

http://earthislandinstitute.net/journal/index.php/eij/article/stolen_skies_the_chemtrail_mystery/

9) " Two scientists working at Wright Patterson Air Force Base **confirmed** to the Ohio newspaper, *Columbus Alive*, that they were involved in aerial spraying experiments. One involved aluminum oxide spraying related to global warming and the other **involved barium stearate and had to do with high-tech military communications.** See:

<http://www.chembuster.us/Las%20Vegas%20Tribune.htm>

10) As **National Oceanic and Atmospheric Administration (NOAA) meteorologist Thomas Schlatter** explains, the formation of condensation trails requires temperatures lower than about minus 76 F and humidity of 70 percent or more. Because the Federal Aviation Authority requires military tankers and transporters to cross continental airspace at altitudes below 30,000 feet, ensuring safe separation from airliners flying between 35,000 and 39,000 feet, **these military flights should leave no contrails at all.** See:

http://earthislandinstitute.net/journal/index.php/eij/article/stolen_skies_the_chemtrail_mystery/

Note: Large mainstream newspapers and publications are careful to not to print what they cannot verify or substantiate, due to litigation concerns.
